DataGrid

The DataGrid control is a high-performance grid component that helps display and manipulate large amounts of data in a tabular format. Its rich feature set includes functionalities like data binding, sorting, grouping, editing, filtering, swiping, dragging, resizing, loading more items, pull-to-refresh, and exporting to Excel and PDF file formats.

ID	Dealer	Name	Is Online	Price
1101		Adams	<input type="checkbox"/>	\$7,549,000

Our Customers Love Us

Having an excellent set of tools and a great support team, Syncfusion reduces customers' development time.
Here are some of their experiences.

Andrea...

Sydea srl

Excellent experience with Syncfusion!

Syncfusion is a product that makes life easier! I use it to create Blazor applications (server side and webassembly) and the controls speed up development a lot....

Ian Yates

Medical IT Pty Ltd

Great support and comprehensive product...

I use a lot of their DocIO toolkit. The support they provide for that is something to aspire to - really great.

Johan Visser

H and T...

The complete component set

It is the most complete component set available. Also very handy is the fact that there is a community edition, this gives me the opportunity to test thing at home without...

What our customers are saying about us

"A creator of online tutorials for Microsoft technologies, your controls helped to provide a rich user experience. I wanted a look and feel like a Windows Store app and the Tiles are useful for that."

Jono Walker, Walkerscott

Awards

Greatness—it's one thing to say you have it, but it means more when others recognize it. Syncfusion is proud to hold the following industry awards.
